Note 1: See the Project Evaluation Report in Appendix 7-1 of the DWWFP/DEIR

Does the project change involve any new or modified:

1. conversion of public parkland or other Article 97 public natural resources to any purpose not in accordance with Article 97? Yes No

2. release of any conservation restriction, preservation restriction, agricultural preservation restriction, or watershed preservation restriction? Yes No

3. impacts on Estimated Habitat of Rare Species, Vernal Pools, Priority Sites of Rare Species, or Exemplary Natural Communities? Yes No

4. impact on any structure, site or district listed in the State Register of Historic Place or the inventory of Historic and Archaeological Assets of the Commonwealth?

Yes No; if yes, does the project involve any demolition or destruction of any listed or inventoried historic or archaeological resources? Yes No

5. impact upon an Area of Critical Environmental Concern? Yes No

If you answered 'Yes' to any of these 5 questions, explain below:

**PROJECT CHANGE DESCRIPTION** (attach additional pages as necessary). The project change description should include:

(a) a brief description of the project as most recently reviewed

(b) a description of material changes to the project as previously reviewed,

(c) the significance of the proposed changes, with specific reference to the factors listed 301 CMR 11.10(6), and

(d) measures that the project is taking to avoid damage to the environment or to minimize and mitigate unavoidable environmental impacts. If the change will involve modification of any previously issued Section 61 Finding, include a proposed modification of the Section 61 Finding (or it will be required in a Supplemental EIR).

As discussed in Chapters 1, 7, and 11 of the attached Draft Wastewater Facilities Plan and Draft Environmental Impact Report (DWWFP-DEIR), the Town of Barnstable (Town) needs to implement a portion of the Recommended Plan in the winter of 2006 and 2007 which is before the full approval of the Final Wastewater Facilities plan and Final Environmental Impact Report (FWWFP-FEIR) that is expected in 2007. The modifications include:

1. Replacement of the current pump station that is too small for its current wastewater flow as well as projected flows that would be added to the collection system once sewers are extended to the AOC.

2. Replacement of the current force main that discharges to a manhole in the center of the South Street/Sea Street intersection where surcharging has been observed, and where it then flows down South Street to the Old Colony Road pump stations. The new force main would be placed in Town roadways to convey the wastewater from the pump station all the way to the Hyannis WPCF.
